<p style="color: red; text-align: center;">CE MARKED STOPPED ON MAY 2020</p> <p style="text-align: center;">ENDOCATH</p> <p>STERILE SINGLE USE PERIPHERAL VENOUS CATHETERS WITH NEEDLE - CATHETER VEINEUX PERIPHERIQUE A AIGUILLE ET ACCESSOIRES (PERFUSION)</p> <p>Code GMDN : 34920 A flexible tube designed for insertion into percutaneously accessible blood vessels for extremities (i.e. the peripheral vasculature) and that is short length to keep its distal tip near the insertion site. The device typically includes a two to eight cm (one to three inches) plastic tube with a metal stylet inside its lumen (over the needle catheters). This device is the most commonly used infusion device for short dwell time (typically seven days or less), for the administration of non irritating fluids, electrolytes, vitamins, medication, and for the injection for certain anaesthetics into the peripheral vasculature of patients with good venous access.</p>	1244.13	ENDOCATH 40CM X 1.3MM 4F	50035483	50032989	IIb
